

GREEN & EFFICIENT BUILDINGS ARE BETTER FOR ST. LOUIS NEIGHBORHOODS

Calling all congregations, nonprofits, and small businesses!

CONGREGATIONS, NONPROFITS, AND SMALL BUSINESSES

The Green & Efficient Buildings Are Better program wants to help you increase your building's energy efficiency and save you money. In the City of St. Louis, buildings account for 80% of the greenhouse gas emissions. Take part in this program and help make our existing buildings heroes in the fight against wasted energy, air pollution, and climate change.

We will work with you to:

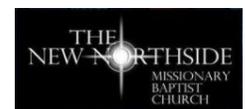

Reduce energy bills & save money

Connect with utility incentive programs

Implement low-cost ways to save energy

Assist with tracking energy use

You don't want to miss out on this opportunity to save energy, reduce operating costs, and reinvest that money into your mission, vision, and the people and communities you serve.
